

ezAccess-Patient Portal for e-Health

→ YOU ALREADY HAVE GE'S CENTRICITY® PRACTICE SOLUTION... NOW YOU CAN HAVE EZACCESS, A PATIENT PORTAL THAT IS A WEB-BASED CPS ADD-ON.

You already have GE's Centricity® Practice Solution (CPS). Now you can have Medical Office Technologies Inc.'s *ezAccess*, a patient portal that is a web-based CPS add-on. *ezAccess* allows patients and doctors to interact anytime 24/7 via the Internet; and it's HIPAA secure, 2011/2012 CCHIT Certified, and user-friendly. In addition, *ezAccess* can be customized to meet each individual practice's needs.

ezAccess significantly reduces manual labor, eliminates unnecessary phone calls, faxes and saves time. Just as patients can do e-banking with their banks, they can now, in similar fashion, do e-health with their doctors. With *ezAccess*, practices raise productivity, realize greater profitability and improve patient care. Beyond this, both doctors and patients benefit from convenient, streamlined health care delivery.

For more information about *ezAccess* or to schedule a demonstration, call (404) 207-1300.

| Pat Name | Description | Instructions | Start Date | Stop Date |
|--------------|-------------------------|--------------|------------|-----------|
| Bobb G Jones | AMOXICILLIN CAPS 500 MG | | 11/06/2010 | |
| Bobb G Jones | ZOLOFT TABS 50 MG | 1 po qd | 11/06/2010 | |

ezAccess HIGHLIGHTS

- New patients can register online and fill out pre-visit questionnaires to collect clinical data; then with a button click, a new patient can be created in Centricity by office staff. This eliminates data entry by staff.
- Established patients can gain an authorization to access the patient portal from clinic staff.
- Patients can request appointments at any time. Only available and approved time slots are shown to the patients. Appointments are approved and denied by Doctor's staff and confirmation is emailed accordingly.
- Doctors can exchange messages at any time with patients, clinic staff or specialists in a different clinic that may or may not have Centricity.
- Patients can request prescription refills.
- Patients can see medication and visit history.
- Patients can see their billing information and statements up to 12 months in the past.
- Patients can pay their bill or schedule payment online.
- Patients can view videos and document their viewing in Centricity.
- Patients can view their demographics and any of the shared clinical data (such as lab results) that the practice has approved to share with them.
- Bulletins can be issued for a variety of purposes, including drug recalls, tests and procedure reminders, or to simply send a greeting.
- Clinical information can be shared with another doctor on a per patient per clinical document basis.
- ezAccess can be configured as your practice's start page OR it can be a link from your existing website.
- ezReminders* give you the ability to send automated phone, email, or text messages to patients.
- ezStatements* can be generated by a doctor's clinic to eliminate paper statements.
- *Optional add-on to ezAccess.
